## Model CCM-3510

## **CrashCamMini™**

The CrashCam™ mini 3510 is a rugged, high-G and vibrationrated camera designed to withstand harsh, space-limited testing environments. With its ultra-compact design, this camera has become the industry standard for on-board vehicular testing and instrumentation of test dummies, but its versatility can be leveraged in any industry. The Model 1550 supports 2560 x 1440 resolution with up to 1,000 fps and comes standard with 8GB DDR RAM, USB-C interface and Cmount lens mount. Additional configuration options include an alternative LEMO interface, replacing the USB-C and HDSDI interface with a 16-pin LEMO connector and a motorized Micro Four Thirds lens mount for non-high-G applications. IDT's optional airborne feature includes special nano coating to protect against condensation due to rapid changes in ambient conditions, and supports GiGE Vision and Chapter 10 IRIG standards. Short Integration is offered as an additional optional feature.

- Ultra-compact form factor
- HDSDI output
- MicroSD compatible
